

# BSP Syllabus

An educational snapshot of Black Swamp instruments and resources

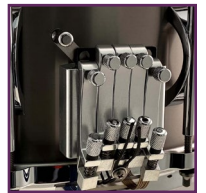

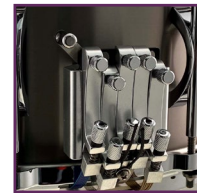

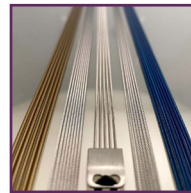

## Orchestral Snare Drums

*For over 20 years, Black Swamp Percussion has offered the most extensive range of orchestral drums on the concert percussion market, with strainer and shell options appropriate for every level of performance.*

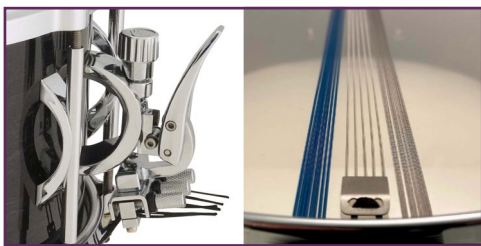

### Multisonic™ Snare System

Five snare units can be engaged and adjusted individually for total dynamic and timbre control.

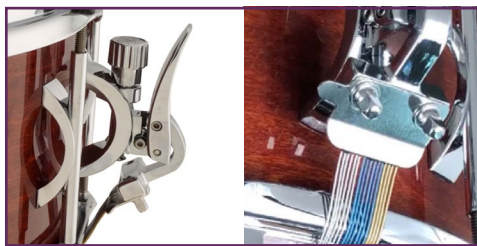

All BSP drums are manufactured, tuned and shipped from our Zeeland, MI facility by experienced craftsmen and trained musicians (that's us).

### SoundArt™

three adjustable snare units

### Pro10 Studio™

progressive tension system

### Concert Maple™

value in sound and cost

## Shell Materials

Along with our ply-Maple shells, we have a selection of contrasting shell types available with the Multisonic or SoundArt snare systems.

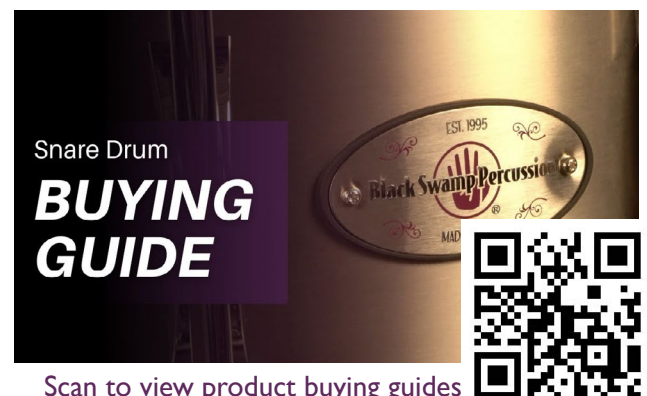

**Titanium Elite™**  
dark and crisp

**Solid Unibody™**  
maximum response

**Medallion Brass™**  
bright and aggressive

## Orchestral Tambourines

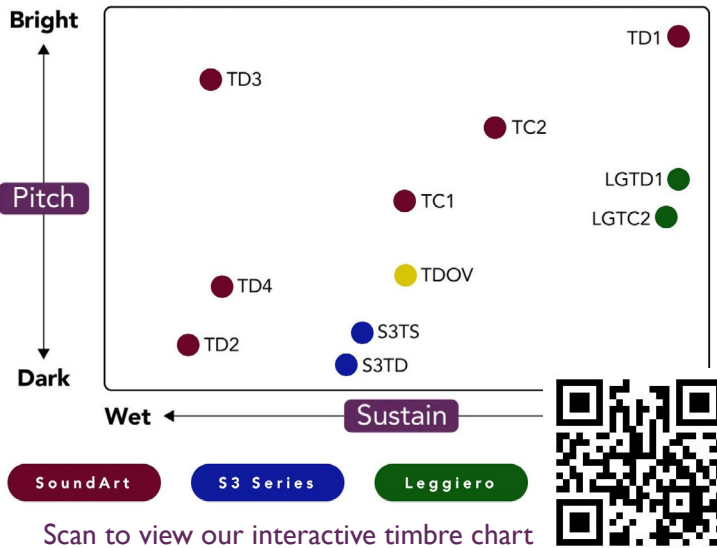

Our original SoundArt Series tambourine reinvented the orchestral tambourine sound, while our Leggiero, Synthetic head and S3 Series redefined the standard!

### SoundArt™ Tambourines

Features include a solid ash shell, captive jingles & parallel jingle slots. Six contrasting jingle configurations provide a variety of musical nuance, projection and color.

### TAMBOURINE TIMBRE CHART

Click a model to view full details and sound samples.

### Leggiero™ Tambourines

Light weight with a quick response. Features a solid Cherry shell and smaller diameter jingles. Single size jingle slots help increase articulation.

### S3 Series™ Tambourines

Features a solid Cherry shell and extra-sensitive, aged brass jingles. Available with calf or Remo heads in single or double row models.

### Overture™ Tambourine

An excellent entry level tambourine. Features a 7-ply Maple shell, brass jingles and Remo head. (model:TDOV)

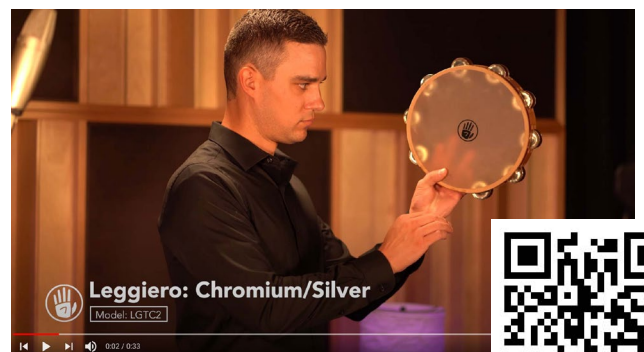

### Performance Tip:

For a “wetter” tambourine sound, hold the tambourine at an angle so jingles can move more freely and sustain longer.  
For a “drier”, more articulate sound, hold the tambourine flat.

### Tambourine OneMount™

A sturdy, simple and versatile mount. Holds tambourines of various shapes and sizes, as well as other frame drums or handled accessories!  
Model:TMount

Calf heads absorb or release moisture, depending on the humidity level of your locale or performance space. To help maintain a consistent head tension, keep your tambourine in it's comfy, padded case. Also, store your instrument in a climate controlled environment like an office, studio or storage locker...not the back seat of your car!

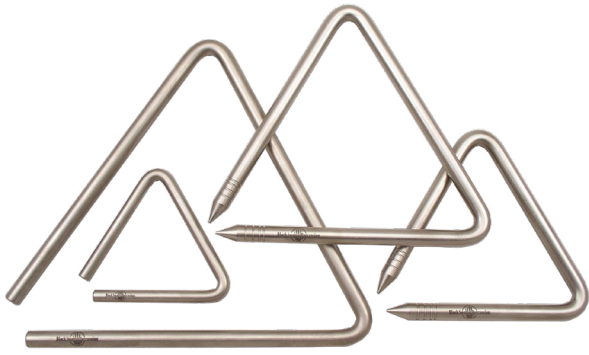

## Triangles and Accessories

*Our extensive series of triangles and beaters, marries color, dynamics and functionality!*

### Artisan™ Triangles

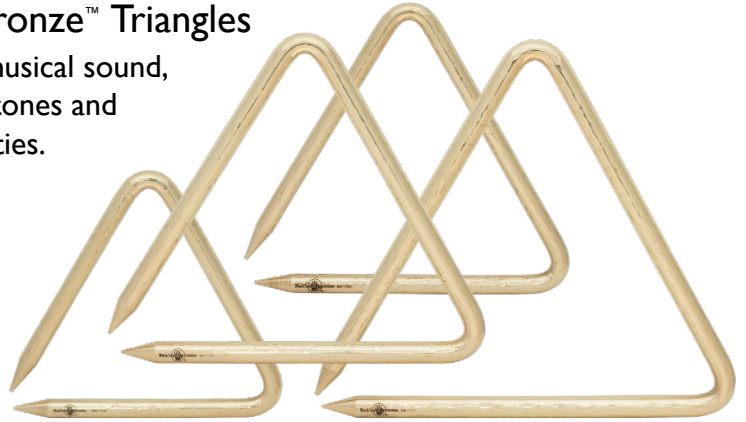

A great starting "point" (get it) to any triangle collection. There's four distinct sizes, each able to produce articulate rhythms and seamless rolls covering a wide dynamic range.

The pointed ends of some of our triangles aren't just for looks. The taper raises the pitch to provide the distinct tone and color our triangles are known for.

### Legacy Bronze™ Triangles

A refined musical sound, full of overtones and lush sonorities.

### Triangle Beaters

**Spectrum™**  
end-weighted

**Select™**  
rod style

Triangle Clip

Triangle Gig Pack

Triangle Bag

### DiSanza Triangle Trigger™

Don't have time to hold and play the triangle? Our Triangle Trigger can be your new best friend! Fully adjustable, and playable with sticks, mallets or fingers.

Finger Cymbal Mount  
Model: TriTrig-FingerCym

### BSP RecPlate™

Easily (and impressively) affix all your rhythmic goodies in one place. Includes several knurled posts, suspension lines and velcro strips.

### Performance Tip:

Angle the triangle beater slightly while playing soft rolls. This shortens the distance between your triangle and beater, making it easier to roll quietly.

## Concert Castanets

*CNC machined, then expertly voiced (by trained castanet technicians) so you get the most musical and consistent castanets available!*

The “elastic-free” tension system provides a consistent performance at every dynamic. Castanets available in Purpleheart and Grenadillo wood.

PCMF

### Performance Tip:

Place your fingertips on the tops of the castanets to help improve control and response during softer passages.

## MultiBass™ Drums

*Put this bass drum exactly where you need it using the lightweight, telescoping legs attached directly to the shell.*

## Concert Toms

*5-ply maple shells, iso-mounts, and custom bearing edges join forces to produce concert toms with articulation and punch.*

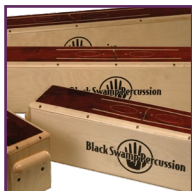

## But wait, there's more!
